Austroads Document Name Supplement Version Date of Approval and Effect; Part 1 (2015) – Introduction to Road Design: 2.0: August 2015: Part 2 (2015) – Design Considerations: 2.0: August 2015: Part 3 (2016) – Geometric Design: 2.2: August 2017: Part 4 (2017) – Intersections and Crossings – General: 2.1: August 2017

## MRWA Supplement to Austroads Guide to Road Design - Part 1

Supplements to the Austroads guide to road design (AGRD) VicRoads uses the Austroads Guides as a key reference, in conjunction with supplementary information, to ensure national consistency and standardisation for all road work. The Austroads Guides to Road Design are available on the Austroads website ([External link](#)).

## Publications | Austroads

Lane widths at intersections are detailed in the Guide to Road Design Part 4: Intersections and Crossings: General (Austroads 2009b). Table 4.3 provides guidance for traffic lane widths on urban arterial roads and Table 4.4 provides traffic lane widths and shoulder widths for urban freeways.

Guide to Road Design - Main Roads Western Australia  
Austroads is based in Sydney and funded by the federal Australian government. [1] [2] Operations of Austroads are primarily administrative, with all research and engineering work contracted out, such as to produce the Australian standards for construction, planning and design in roads.

Supplement to Austroads Guide to Road Design Part 4A  
Austroads has released the Guide to Road Design, Part 5: Drainage – General and Hydrology Considerations (2013) and all road agencies across Australasia have agreed to adopt the Austroads guides to provide a level of consistency and harmonisation across all jurisdictions.

Austroads Guide to Road Design Part 5 Supplement  
Main Roads are responsible for delivering and management of a safe and efficient main road network in Western Australia. Representing one of the world's most expansive road networks, we are committed to working cooperatively and productively across all levels of government, to ensure our road network meets the needs of the community, industry and stakeholders.

## Austroads Guide To Road Design

The Austroads Guide to Road Design is intended to provide designers with a framework that promotes efficiency in design and construction, economy, and both consistency and safety for road users. The guide moves away from rigid design limits as the basis for achieving these goals, and promotes the concept of ' context-sensitive design ' .

## Guide to Road Design Part 3: Geometric Design

In summary, the Austroads Guide to Road Design is the primary technical standard for road planning and design in Queensland. Queensland variations are documented in the Road Planning and Design Manual, Volume 3: Guide to Road Design.

This Guide has been developed to be read as a supplement to the Austroads Guide to Road Design, Part 6: Roadside Design, Safety and Barriers (2009). A copy of this document can be purchased from the Austroads website .

Publications | Austroads

Austroads has released the Guide to Road Design, Part 3: Geometric Design and all road agencies across Australasia have agreed to adopt the Austroads guides to provide a level of consistency and harmonisation across all jurisdictions.

Road design : VicRoads

The Austroads Guide to Road Design provides Normal Design Domain criteria suitable for new roads (greenfield sites). In most cases, the same criteria that is used for greenfield sites should also be used for modifications and upgrades to existing roads (brownfield sites).

Road design - Supplements to Austroads Guides -

Technical ...

Guide to Road Design Part 6: Roadside Design, Safety and Barriers provides an introduction to roadside design and guidance on roadside safety and the selection and use of road safety barrier systems. Roadsides have to accommodate many features that support the road and the safe and efficient operation of traffic, and have to be designed with regard to environmental requirements.

MRWA Supplement to Austroads Guide to Road Design - Part 6

The philosophy and principles set out in the suite of Austroads Guides, and Main Roads Supplementary Information, underpin the creation of a successful, site-specific design solution. Designers choose the features of the road and dimensions of its elements based on technical guides, calculations and their own experience and judgement.
