2014 SOLIDWORKS Help - Autotransitioning

We can't transition height, but we can transition max-height, since it has an explicit value. At any given moment, the actual height of the element will be the maximum of the height and the max-height. So as long as max-height's value is greater than what auto comes out to, we can just transition max-height and achieve a version of the desired ...

If the user running the transition has permissions to run only the 1st transition, the 2nd transition will be denied and the file will be stranded in the state between the 1st transition and 2nd transition. There isn't a way to have the transition be "taken over" and executed by the admin unless you're using a custom add-in.
