AWS Lambda - Developer Guide

The biggest cost of a custom authorizer is that there is the additional latency in your API Gateway calls. Most people are familiar with the cold start problem with AWS Lambda. Since your custom authorizer is a Lambda function, you could be paying this penalty twice — once on the custom authorizer, and once on your core function.

Getting Started with AWS Lambda - AWS Documentation

AWS Lambda is a serverless computing service provided by Amazon Web Services (AWS). Users of AWS Lambda create functions, self-contained applications written in one of the supported languages and runtimes, and upload them to AWS Lambda, which executes those functions in an efficient and flexible manner.

AWS Lambda with Node.js: A Complete Getting Started Guide

AWS Lambda is changing the way that we build systems in the cloud. This new compute service in the cloud runs your code in response to events, automatically managing the compute resources for you. This makes it dead simple to create applications that respond quickly to new information.
