The BBS02 was first released in 2014, and at the time was one of the first plug-and-play mid-drive electric bike kits available. Unfortunately the 'A' version suffered from poor quality controller MOSFETs that could not deal with the higher current of the motor, and were very susceptible to overheating leading to a lot of premature failures. In 2015 Bafang upgraded the controller from six ...

### **Bafang BBSHD 1000 Mid Drive Kit - IN STOCK!**

BBS02 MID DRIVE EBIKE KIT. I bought this about 1 month ago. The installation instructions were not super, but there is plenty of help on Luna's website and YouTube. This was a fun project to complete and I absolutely love this addition to my Raleigh Detour 2! Hills that you thought would discourage me from riding are a breeze with peddle assist.

### **BBS02 Mid Drive 1500 watts edition : LUNA CYCLES**

The BBS02 is a mid drive. It replaces your existing crank set, connects to your bottom bracket and uses the existing gears of your bike to power the bike. That means it can be an excellent climber, or a 30mph street rocket with the same set up. Hub motors are either geared for torque or geared for speed, with the Bafang BBS02 you get it all.
