Plasma cholinesterase (also known as pseudocholinesterase, butyrylcholinesterase, or BuChE) is a serine hydrolase that catalyses the hydrolysis of esters of choline.

Acetazolamide: mechanism of action
Have you had a critical event in medicine (e.g. hypotension, unstable patient, hemorrhage) where you used a cognitive aid checklist? If so, please help the AIM lab by completing a short online survey to help us better understand how medical checklists can be better designed and used for patient care.

Acetazolamide. Acetazolamide is a reversible inhibitor of the carbonic anhydrase enzyme that results in reduction of hydrogen ion secretion at the renal tubule and an increased renal excretion of sodium, potassium, bicarbonate, and water. It can be used as a diuretic or to treat glaucoma as it prevents excessive build up of aqueous humor.

Pseudocholinesterase synthesis
Conclusions: Despite the fact that anesthesia in chronic liver disease is a scary and pretty challenging condition for every anesthesiologist, this hazard

Cricoid pressure, also known as the Sellick manoeuvre or Sellick maneuver, is a technique used in endotracheal intubation to try to reduce the risk of regurgitation. The technique involves the application of pressure to the cricoid cartilage at the neck, thus occluding the esophagus which passes directly behind it.. Cricoid pressure should not be confused with the "BURP" (Backwards Upwards ...
