Force is defined as the pull or push when a body interacts with another body. It is equal to the weight of the body. The expression of finding the weight of a substance is given as  $W = mg$  Where  $W$  is the weight,  $m$  is the mass of the substance and  $g$  is the acceleration due to gravity which is equal to approximately  $9.81 \text{ m/s}^2$ .
