Pulmonary emboli usually arise from thrombi that originate in the deep venous system of the lower extremities; however, they rarely also originate in the pelvic, renal, upper extremity veins, or the right heart chambers (see the image below). After traveling to the lung, large thrombi can lodge at the bifurcation of the main pulmonary artery ...

Tutorials & Videos - Physical Diagnosis & Physical Exam ...

Summary. Examination of the head and neck is a fundamental part of the standard physical examination. It is typically one of the first parts of the physical examination and is performed with the patient in a seated position. Because the complete head and neck examination is lengthy, it is usually tailored to the patient's history and presenting complaint.

Abdominal examination - Wikipedia

A respiratory examination, or lung examination, is performed as part of a physical examination, in response to respiratory symptoms such as shortness of breath, cough, or chest pain, and is often carried out with a cardiac examination.. The four steps of the respiratory exam are inspection, palpation, percussion, and auscultation of respiratory sounds, normally first carried out from the back ...
