2003, Herzog & de Meuron's design was chosen and was named as the Bird's nest. Now the architects faced the challenge of transforming this highly ambitious project into a reality. It has grand curving beams, which criss-cross in an inter cut pattern of woven steel.

Beijing National Stadium - Wikipedia

Over one hundred years later, at the 2008 Olympic games in Beijing, China unveiled its own architectural wonder, which, like the Eiffel Tower, was a metal mega-project. The Beijing National Stadium - more often referred to as the Bird's Nest Stadium - took five years to complete and was constructed using 42,000 tons of steel , making it the largest steel structure in the world.

Beijing National Stadium (Bird's Nest) | StadiumDB.com

The concept behind the Beijing National Stadium was born from old Chinese art with woven lines around a circular vessel. The architects had not thought about a bird or a nest. However, the panel and the public quickly realized it was similar to a bird's nest during exhibition and the name Bird's Nest was born and spread far and wide around the world.
