...

Belt Conveyors Conveyor belts are most commonly used to transport bulk material. Allegheny Manufacturing designs and manufactures heavy- duty conveyor systems for many different applications, from fine powders to large lump materials.

Industrial Belt Conveyors for Bulk Materials Handling

The angle of surcharge of a material is the angle to the horizontal which the surface of the material assumes while the material is at rest on a moving conveyor belt. This angle usually is 5 degrees to 15 degrees less than the angle of repose, though in some materials it may be as much as 20 degrees less.

Belt Conveyor Manufacturer | Bulk Material Handling

Incline-bed belt conveyors have a steep 45° incline. The intake end of the conveyors mounts low to the ground to catch small parts, waste, or other bulk materials as they come out of a process or machine and carry the items up to elevated bins, hoppers, drums, or similar containers or up to a higher level in a facility for further processing.
