The Daimler-Benz DB 601 engine.

Collection Item Summary: In 1934, Daimler-Benz began the design of the DB 600, the first of a highly-successful series of engines. The DB 600A/B was a supercharged, inverted V-12 rated at 746 kW (1,000 shp).

Daimler-Benz DB 600 - Wikipedia

The DB 603 aero engine was largely based on the DB 601 design. However, at 2,717 cubic inches the engine 's displacement was substantially increased, as was its output. The unit was fitted to various single- and twin-engined military aircraft, and was manufactured in large numbers by Daimler-Benz AG during World War II. Cylinders V12

Daimler-Benz DB 601 - Aviation History

Daimler-Benz DB 601. The DB 601 was a development of the DB 600G with direct fuel injection, which permitted better fuel economy, and eliminated the carburetor cutting out the engine during negative G-loads. The supercharger in the new engine was driven through a stage-less, automatically controlled hydraulic clutch. The supercharger speed was ...

Daimler-Benz DB 601 - Wikipedia

Mercedes-Benz DB 601 A aircraft engine. The DB 601 was the world s first production engine with direct gasoline injection. The fuel/air mixture was not produced in a carburetor, as was customary at the time, but directly in the cylinder, thereby boosting output. In 1939, a Me 209 with such an engine reached a speed of 469 mph – a record that ...
