Bioactive Compounds from Natural Sources: Isolation ...

Interest in obtaining biologically active compounds from natural sources has recently spiked due to their low toxicity, complete biodegradability, availability from renewable sources, and in most cases, low cost.

Over the last 20 years, the use of supercritical fluid extraction research has increased in the field of natural products. SFE methods have been used to harvest a large range of extracts from oils, oleoresin, groups of bioactive compounds (alkaloids, terpenes, and phenolic) as well as single compounds (β -humulene, lycopene and
