me to write [my] book in the first place. *Biological Physics* is the most interesting and well-written textbook I have ever read."

Biological Physics, Updated Version 1, Philip Nelson ... I'm currently studying the physics of artificial biomembranes, biopolymers such as DNA, and other "soft" condensed matter systems. There is a great cultural gap between physics, which seeks to understand extremely simple systems, and biology, which is obliged to study the overall behavior of extremely complex systems.
