Top 10 Bitcoin Security And Safety Tips

We find that larger, more decentralized cryptocurrencies (e.g. Bitcoin), pegged cryptocurrencies (i.e. sidechains), as well as distributed computing platforms (e.g. Ethereum), do not easily fit the definition of a security and also do not present the sort of consumer risk best addressed through securities regulation.

About Bitcoin Security

Another important Bitcoin security and safety tip that any Bitcoin user should remember is to keep private keys offline. As you know, Bitcoin wallets would make use of public keys for sending and receiving Bitcoins. The public keys are also used for other functions such as checking your Bitcoin account balances.
