Eye black is a grease or strip applied under the eyes to reduce glare, although studies have not conclusively proven its effectiveness. It is often used by American football, baseball and lacrosse players to mitigate the effects of bright sunlight or stadium floodlights.. The wearing of eye black almost uniquely by American sports players appears to have more to do with aesthetics as Paul Lukas ...

Black cats can also "rust" in sunlight, the coat turning a lighter brownish-red shade. Eumelanin, the pigment that is required to produce the black fur, is somewhat fragile, so the rusting effect can be more pronounced in cats that frequently spend time in the sun. A rarer situation that can also cause rusting is a deficiency of the amino acid ...

Other attempts to produce devices that could use sunlight to split water have relied on corrosive solutions or on relatively rare and expensive materials such as platinum. The artificial leaf is a thin sheet of semiconducting silicon — the material most solar cells are made of — which turns the energy of sunlight into a flow of wireless ...

Some medications, such as antibiotics, acne medications, and antimalarial drugs, can make you more susceptible to sunburns. When taking these medications, avoid direct exposure to the sun and wear protective clothing, such as hats and long sleeves. If you get a severe burn with other symptoms such as fever, nausea, and blistering, contact your provider.

YES Parking Program Save gas and time by riding together. To encourage carpooling, Sunlight Supply Amphitheater has created the YES (Your Enhancement of Service) Program, rewarding participating vehicles with prime parking (close proximity to the venue and egress priority after the event). Space is limited and is on a first-come first-serve basis.
