Blockchain -the Ultimate Guide - with John Craddock

A block is a collection of data. And each piece of data is added to the blockchain by connecting one block after another in a chronological way, much in the same way a row of a spreadsheet follows another row. And this series of connected blocks one after another makes it a chain of blocks (i.e. a blockchain).

## Cryptocurrencies Smart Contracts And The Future Of Money

Getting Bitcoin blockchain explained is essential to understanding how blockchain works. The Bitcoin blockchain is a database (known as a "ledger") that consists only of Bitcoin transaction records. There is no central location that holds the database, instead it is shared across a huge network of computers.
