New engine has improved cylinder block for balancing shafts. At the same time cylinders dimensions were increased up to 85 mm. New crankshaft was installed with 83.5 mm stroke

BMW 316 Problems | CarComplaints.com

Last year I had a similar problem but there was nothing wrong with the idling. For example the car would be running fine, I'd pull up at the lights, have no problems but when they go green and I try to accelerate away the engine would suddenly go flat and lose power for a few seconds before roaring back to life.
