Book Extrusion Coating A Process

For the demanding process of extrusion coating this study focuses on aspects of extruder and die design, chill roll cooling and the critical optimization of adhesion to all substrates and films. Tubular and flat die coextrusion processes are comprehensively evaluated with the emphasis on melt stability, layer distribution, interlayer adhesion and physical properties.

Extrusion Coating: A Process Manual - Google Books

The course is designed to help students learn about basic resin and equipment technology (extruders, dies, auxiliary equipment) that have applications in the extrusion coating application process. They will also obtain detailed instruction for equipment and process technology specific to the extrusion coating process.
