CHAPTER III BOOLEAN ALGEBRA

All Boolean expressions, regardless of their form, can be converted into either of two standard forms: The sum-of-products (SOP) form. The product-of-sums (POS) form. Standardization makes the evaluation, simplification, and implementation of Boolean expressions much more systematic and easier.

Example Problems Boolean Expression Simplification

This is perhaps the most difficult concept for new students to understand in Boolean simplification: applying standardized identities, properties, and rules to expressions not in standard form. For instance, the Boolean expression $ABC + 1$ also reduces to 1 by means of the " $A + 1 = 1$ " identity.
