Breaking Bad News to Someone with Dementia

Most of us find the act of breaking bad news a professional burden that we could just as soon do without. When we perceive an element of personal responsibility, our burden becomes greater: We may experience fear, guilt, or shame and, for some, that leads to psychological stress disorders and burnout.

SPIKES - The Six-Step Protocol for Delivering Bad News

From an early stage, doctors find themselves in situations where they need to convey difficult news to patients and/or relatives. Bad or distressing news is never easy to hear, but having someone deliver the news well can make the person receiving the news feel respected, cared about and supported going forwards.
