Mentor, a Siemens Business, is a broad line EDA supplier. It provides a complete semiconductor design flow that includes simulation, emulation, place and route, verification, design for manufacturing, and test. It also develops tools for wire harness systems and computational fluid dynamics.

Cybersecurity for autonomous vehicles: Review of attacks ...  
The power consumed in a device is composed of two types – dynamic, sometimes called switching power, and static, sometimes called leakage power. In geometries smaller than 90nm, leakage power has become the dominant consumer of power whereas for larger geometries, switching is the larger contributor. Power reduction strategies can be used to minimize both... » read more

Internet - Wikipedia  
Radio broadcasting in the United States has been used since the early 1920s to distribute news and entertainment to a national audience. By 1931, a majority of U.S. households owned at least one radio receiver. It was the first electronic "mass medium" technology, and its introduction, along with the subsequent development of sound films, ended the print monopoly of mass media.
