It may take up to four weeks for the skin around the PEG tube to heal. Clean the skin around your PEG tube every one to three days or if it is dirty with mild soap and water. Try to gently remove any drainage or crusting on the skin or tube. Then put a new bandage around the tube. Do not use any ointments...

Bruising Peg. Pages from the Journal of Margaret Molloy ...  
Most bruises form when small blood vessels (capillaries) near the skin's surface are broken by the impact of a blow or injury — often on the arms or legs. When this happens, blood leaks out of the vessels and initially appears as a black-and-blue mark. Eventually your body reabsorbs the blood, and the mark disappears.

PEG tubes: dealing with complications | Nursing Times  
Re: Peg Perego Convertible causing back bruising I have seen this complaint from parents who have used various carseats. The best resolution is to find a different carseat with different padding.
