BS EN ISO 2808:2007, BS 3900-C5:2007 Paints and varnishes. Determination of film thickness. BS EN ISO 2808 is an international standard that describes a number of methods that are applicable to the measurement of the thickness of coatings applied to a substrate.

Part F2: Determination of resistance to humidity (cyclic ...

Dry film thickness (DFT) is the thickness of a coating as measured above the substrate. This can consist of a single layer or multiple layers. DFT is measured for cured coatings (after the coating dries). Thickness of a coating depends on the application and type of process employed.
