Technical Information | Glass and Safety | Saint-Gobain

The comparisons between the classification systems under BS 6206 and BS EN 12600 are shown below. Both BS 6206 and BS EN 12600 use pendulum impact tests with similar drop heights and grades safety glass under one of three impact performance classifications. BS 6206 grades are 'A, B or C' with 'A' being the highest performance grade.

EN 12600 : 2002 | GLASS IN BUILDING - PENDULUM TEST ...

Requirement for safety glazing means any glass, plastics or safety films fitted in 'critical locations' must comply with BS 6206: 1981. Diagram 1 below details 'critical locations' in internal and external walls. The glass supplied for these applications must conform to . Toughened Glass BS EN 12600: 2002 (previously BS 6206)

Essential Window and Door Safety Information For Homeowners

European/British Standards and Codes of Practice There are many British and European Standards which apply directly or indirectly to glass for use in building. Although not exhaustive, the following lists some of the most commonly used. British and European Standards (BS EN)

6.7 - 17 Marking of safety glass - NHBC Home

BS6206/EN 12600 Performance Datasheets. Sureguard Window Films enhance the privacy, security, and safety of glass surfaces.

DIN EN 12600 - European Standards

BS EN 12150-1:2000 specifies the tolerances, flatness, edgework, fragmentation, and physical and mechanical characteristics of monolithic flat thermally toughened soda lime silicate safety glass for use in buildings.

Bs En 12600 Free

•BS EN 12150,BS EN 14179,BS EN 14449 The classification following testing to BS EN 12600. •This will be Class 1,2 or 3. The name or trade mark of the manufacturer. Old System (obsolete) •The British Standard number BS 6206. •The category of safety glass being used e.g.Class A,Class B or Class C.

SAFETY AND SECURITY The Right Glazing in the Right Place

BS EN 12600 has now superseded BS 6206 as a European wide performance standard for the impact safety of glazing. Sometimes referred to as “the pendulum test”, it incorporates the swinging of a weight from three heights into a standard sized pane of glass. The point at which the glass breaks forms part of its classification.

BS EN 12150 TOUGHENED GLASS CERTIFICATION – CENSolutions ...

Marking of Installed Safety Glass With the commencement of CE marking for certain ‘safety glasses’ on the 1 September 2006 any reference/marketing to BS 6206 shall cease. Therefore to comply with Building Regulations regarding “Glazing in hazardous locations”, i.e.Approved Document.N,P2 or V1,the installed glazing must continue to be marked.

U70 060 GLASS SPEC

BS EN 12600:2002 specifies a pendulum impact test method for single flat panes of glass for use in buildings. The test is intended to classify flat glass products into three principal classes by performance under impact and by mode of breakage.
