The Building Of Hope And Resilience In A Child | Michael Kalous | TEDxHelena

This combination of supportive relationships, adaptive skill-building, and positive experiences is the foundation of resilience. Children who thrive well in the face of serious hardship typically have a biological resistance to adversity and strong relationships with the important adults in their family and community.

Resilience

Building resilience — the ability to adapt well to adversity, trauma, tragedy, threats or even significant sources of stress — can help our children manage stress and feelings of anxiety and uncertainty. However, being resilient does not mean that children won't experience difficulty or distress.
