1. Introduction. The history of medicinal plants dates back to the origin of human civilization on earth. Several of these may have been used to treat viral infections in the past, however, first recognized interest in their development as antiviral agent is the efforts of the Boots drug company (Nottingham, England) to screen 288 plants for anti-influenza activity (Chantrill et al., 1952).

pressure (BP) in adults, 46% of US adults have hypertension. 1 The diagnosis and management of hypertension depend on the accurate measurement of BP.

Solved problems in quantum mechanics - Unife

Memory is one of the most fundamental mental processes.

Neuroscientists study this process by using extremely diverse strategies. Two different approaches aimed at understanding learning and memory were introduced in this symposium. The first focuses on the roles played by synaptic plasticity, especially in long-term depression in the cerebellum in motor learning, and its regulatory mechanism.
