Note. Tuples were available before C# 7.0, but they were inefficient and had no language support. This meant that tuple elements could only be referenced as Item1, Item2 and so on. C# 7.0 introduces language support for tuples, which enables semantic names for the fields of a tuple using new, more efficient tuple types.

Don't Code Tired | Using C# 7.1 Features

I did not test every single C#7 feature, but in general, with the exception of Tuples (and their related features like deconstruction), it should work in .NET 2.0 and above as most of it is just syntactic sugar. That being said, yes you need VS2017 to compile C#7. I'm sure at some point other compilers will support C#7 but not today.
