Area and Perimeter of Irregular Shapes

So that is perimeter. Area is kind of a measure of how much space does this thing take up in two dimensions? And one way to think about area is if I have a 1-by-1 square, so this is a 1-by-1 square-- and when I say 1-by-1, it means you only have to specify two dimensions for a square or a rectangle because the other two are going to be the same.
