The Cancer Journal
The complete NCCN Guidelines for Cervical Cancer provide recommendations for the diagnosis, evaluation, and treatment of cervical cancer. This manuscript discusses guiding principles for the workup, staging, and treatment of early stage and locally advanced cervical cancer, as well as evidence for these recommendations.

Cancer pain is one of the most common and problematic symptoms faced in palliative care. Despite advances in cancer treatment and palliative care, pain has been reported to be moderate to severe in as many as 51.9% of patients with advanced disease and 38% of all patients. 1 Uncontrolled pain often results in unnecessary suffering; it can have an impact on quality of life and interfere with ...

Treatments in Mexico

Gastric cancer is the sixth most common cancer and the third most common cause of cancer-related death in the world. [] Although rates are low in North America and Northern Europe—in the United States, stomach malignancy is currently the 15th most common cancer [] —the disease remains difficult to cure in Western countries, primarily because most patients present with advanced disease.
