Graphite Paper by Craft Smart® - Michaels Stores

A sheet of carbon paper is placed between two or more sheets of paper. The pressure applied by the writing implement (pen, pencil, typewriter or impact printer) to the top sheet causes pigment from the carbon paper to reproduce the similar mark on the copy sheet(s). More than one copy can be made by stacking several sheets with carbon paper between each pair. Four or five copies is a practical limit. The top sheet is the original and each of the additional sheets is called a carbon copy.

Transfer Paper and Artist Graphite Paper: Tips and Tricks ...

A sheet of carbon paper, with the coating side down Carbon paper (originally carbonic paper) was originally paper coated on one side with a layer of a loosely bound dry ink or pigmented coating , bound with wax , used for making one or more copies simultaneously with the creation of an original document when using a typewriter or a ballpoint pen .
