Person-Centered Theory. Developed by Carl Rogers person-centered theory is used in therapeutic settings to help people deal with their problems. When originally developed it was revolutionary because it did not place emphasis on the therapist but on the patient and their perception of themselves.

Person-centered therapy - Wikipedia

Carl Rogers applied his experiences with adult therapy to the education process and developed the concept of learner-centered teaching. He had the following five hypotheses regarding learner-centered education: "A person cannot teach another person directly; a person can only facilitate another's learning" (Rogers, 1951).

Carl Rogers' Core Conditions Carl Rogers' Core Conditions ...

The origins of person-centred care are in humanistic psychotherapy. Carl Rogers (1951) suggested we develop a view of ourselves in childhood based on our interactions with important others. If we are loved, valued and respected, we feel worthy of love, value and respect. Rogers called this unconditional positive regard. If we are only valued for behaving in a certain way, we learn to hide some thoughts and behaviours. This conditional positive regard leads to a lack of congruence.
