relationships . • Identify units of measure associated with linear relationships . • Determine solutions both graphically and algebraically . • Determine solutions to linear functions using intersection points .
LEARNING GOALS KEY TERMS • first differences • solution

Lesson 7.1 Skills Practice
Identify the constraints as a system of linear inequalities. Define your variables. Let c represent the number of compact cars purchased. Let f represent the number of full-size cars purchased. $c \leq 9,000$ $f \leq 15,000$ $5c + 15,000f \leq 180,000$ $c \geq 1$ $f \geq 1$ **b. Graph the solution set for the system of linear**

Objective: Given an understanding of linear functions, students will explore connections of linear functions represented in a table, as a graph, or function notation.

Carnegie Learning: MATHia - Graphing Linear Inequalities in Two Variables Workspace
The inequalities in a system of linear inequalities are known as constraints because the values of the expressions are “constrained” to lie within a certain region. 2. solution of a system of linear inequalities The solution of a system of linear inequalities is the intersection of the solutions to each inequality in
