## CATHODIC PROTECTION BASIC PRINCIPLES AND PRACTICES – What

...

Cathodic interference refers to an intermolecular type of bond used to ground a negatively charged electrode system. Cathodic interference is produced when there is proximity to a polarized cathode. The current flow is always away from the area near the cathode.

## Cathodic Protection Interference - NACE International

Stray current interference is very damaging for steel pipelines and other structures because it involves huge current and a small coating defect or holiday may cause extensive corrosion and metal loss of structure. The corrosion is localized and mostly pitting corrosion and a deep pit is formed due to localized current discharge.
