Jefimenko's equations - Wikipedia

In "Causality, Electromagnetic Induction and Gravitation", he similarly showed, that causality implies the existence of a "gravikinetic" field. Jefimenko delineated numerous analogous laws between EM and GK fields, but did not fully establish an isomorphism between the mathematics describing gravity and electromagnetism.

A GRAVITATIONAL AND ELECTROMAGNETIC ANALOGY

There is a widespread interpretation of Maxwell's equations indicating that spatially varying electric and magnetic fields can cause each other to change in time, thus giving rise to a propagating electromagnetic wave (electromagnetism). However, Jefimenko's equations show an alternative
