VLAN Routing with Layer 3 Switch Routed Ports > IP Routing ...

The main goal of a router is to route packets. In other words: when it receives an IP packet it has to look at the destination address, check the routing table and figure out the next hop where to forward the IP packet to. We use routing protocols to learn different networks and to fill the routing table. Here's an illustration to visualize this:

ENCOR Exam Topics - Cisco

enabling IP routing; modifying the default VLAN; installing a static route; implementing a routing protocol; creating SVI interfaces; Explanation: Step 1. Create the VLANs. Step 2. Create the SVI VLAN interfaces. Step 3. Configure access ports. Assign them to their respective VLANs. Step 4. Enable IP routing.
