CCNP Security - Cisco  
In building your CCNA Security lab, the first thing you need to consider is picking up a router that can support the IOS with the feature set to cover the exam objectives. Many students assume that the older 2500, 2600 or even some of the 2600XM 12.4 series routers which support IP/FW/IDS Plus or IPSEC 3DES will do the job.

How to Build a Cisco CCNA Security 210-260 Lab ...  
What Equipment is NEEDED for ccnp Security Lab Well, to properly practice the lab, you will need 2 x 5510 and 1 x IPS. I wont bother with the IOS security as you most probably have that covered with your R&S setup. When you say that they had IPS in their lab, what are you trying to find out?
