Chapter 16 Evolution Of Populations

Prentice Hall Biology, Chapter 16 Evolution of Populations. 16-1 Genes and Variation 16-2 Evolution as Genetic Change 16-3 The Process of Speciation. Terms in this set (17) gene pool. the combined genetic information of all the members of a particular population. relative frequencies.

Chapter 16: Evolution of Populations

Chapter 16 Evolution of Populations 16-1 Genes and Variation Darwin's original ideas can now be understood in genetic terms. Beginning with variation, we now know that traits are controlled by genes and that many genes have at least two forms, or alleles. We also know that individuals of all species are heterozygous for many genes.
