Accounting Chapter 25 Flashcards | Quizlet
A standard cost system is a method of setting
cost targets and evaluating performance.
Targets or expected costs are set based on a
variety of criteria, and actual performance
relative to expected targets is measured.
Significant differences between expectations
and actual results are

Standard Costs – Overview

On March 1, the Direct Materials Inventory
account is increased by the standard cost of
\$9,000 (3,000 yards at the standard cost of
\$3 per yard), Accounts Payable is credited
for \$9,150 (the actual cost of the denim),
and the difference of \$150 is debited to
Direct Materials Price Variance as an
unfavorable price variance:

Standard Costing | Explanation | AccountingCoach

Standard cost, however, is the standard quantity of an input required per unit of output times the standard price per unit of that input. For example, if the standard price of cloth is \$ 3 per yard and the standard quantity of material required to produce a dress is 3 yards, the standard direct materials cost of the dress is 3 yards x \$ 3 per yard = \$ 9.

Chapter 10 Standard Costs and the Balanced Scorecard True/False 1. F Easy Standard costs should generally be based on the actual costs of prior periods. 2. F Easy The standard direct labor rate should not include fringe benefits. 3. F Medium From a standpoint of cost control, the most effective time to recognize material price variances is when the materials are placed into production.

NFPA 25: Standard for the Inspection, Testing, and ...

After a period, say one month, the company compares the actual cost incurred per unit, say \$2.05 to the standard cost and determines whether it has succeeded in controlling cost or not. This comparison of actual costs with standard costs is called variance analysis and it is vital for controlling costs and identifying ways for improving efficiency and profitability.
