29.6.7 Coastal and Marine
Aquaculture. Aquaculture is
growing in nearly all regions of
the globe. According to the UN
FAO, between 1985 and 2016, the

Where To Download Chapter 6 Aquaculture Site Selection And Marine Spatial

share of finfish from aquaculture as a percent of total fisheries production (from both capture fisheries and aquaculture) grew from 19% to 44% (FAO, 2016).

Site Selection for Aquaculture | SpringerLink

Aquaculture is an economic human activity that uses and transforms natural aquatic resources into commodities

Where To Download Chapter 6 Aquaculture Site Selection And Marine Spatial

valued by society, e.g., fish, shrimp, mussels, and seaweed. In doing so it may impact on biodiversity, essentially due to the consumption of resources, the transformation process (aquaculture), and the production of wastes (Fig. 1).
