Chemical Reaction Classification Practice Test There are many different types of chemical reactions. There are single and double displacement reactions, combustion reactions, decomposition reactions, and synthesis reactions. See if you can identify the type of reaction in this ten question chemical reaction classification practice test.

Balancing Equations: Practice Problems

Martin Leigh / Getty Images Good job! You completed the quiz, so you've seen examples of the different types of chemical reactions. If you're still a bit shaky on how to tell the types of reactions apart or if you just want more examples, you can review the main reaction types. If you're ready to try another quiz, see how familiar you are with the units of measurement.
