The textbook provides an important opportunity for students to learn the core concepts of chemistry and understand how those concepts apply to their lives and the world around them. The book also includes a number of innovative features, including interactive exercises and real ...

Chemistry - 2e - Open Textbook Library

In chemistry, a nonmetal is a type of chemical element generally characterized by low density, low strength, and a tendency to form acidic compounds. About half are colored or colorless gases whereas nearly all metals are silvery-gray solids. Most are poor conductors of heat and electricity, unlike metals. Their reactivity, akin to that of the metals, ranges from highly active to noble, the ...
