Design Guides provide a very good source of guidance for the design of working spaces, and can be considered as best practice. Lighting Guide (LG) 7 is possibly the one most commonly referred to, but it is often misunderstood by being used to specify luminaires rather than the total environment of the space.

considerably since the previous version of this lighting guide, LG7 Office lighting, was published in 2005.

CIBSE Recommended Lighting Levels | Lux Requirements
LG 7 is the more appropriate guide - the lighting design for offices however should ideally be in accordance with BS EN 12464-1 - LG7 and the SLL Code for lighting just help you comply with the standard - they are not standards in thier own right (and shouldn't be used as such).

CIBSE Recommended Lighting Levels - Mount Lighting

Download Ebook Cibse Lighting Guide 7

According to The Lighting Guide 7 (2005), for offices the recommended design maintained illuminance over the task area in any room ranges from 300 to 500 lux. For work like data retrieval or telesales, the lower end of this range should be used and for tasks involving writing or copy typing, 500 lux would be needed.

CIBSE say this about LG3:

"This effectively replaces Lighting Guide 3 as the relevant guidance for office buildings. However, there are many other buildings where display screen equipment is used, that Lighting Guide 3(now out of print) provides useful guidance for such applications." There is a useful free guide here:
