File Type PDF Cisco Ironport Url Filters Ironportstore Cisco IronPort URL Filters - IronPortStore.com With this filter in place, the system scans for a URL with a Malicious reputation (-10.00 to -6.00), adds a log entry to the mail logs, uses the defang action in order to make the link unclickable, and places this into a URL Filtering Page 8/29

IronPort S195 Web Security Appliance | IronPortStore.com

I've just recently enabled the URL filtering feature on our C370 appliances, and created a content filter rule that quarantines all messages containing URLs that Cisco deems "malicious" (scores between -10.0 and -6.0). However, that filter is catching way to many messages that don't seem to be malicious.
