ANCHORS | Climbing Technology

TOP-ROPE ANCHORS. Top-rope climbing is one of the safest forms of climbing, where the rope runs from the belayer to the anchor at the top of the route, and then back down to the climber. If the climber falls, a tight belay means that the fall will be kept to a minimum - often only a small amount of rope stretch.

Anchors | Fixe Climbing

Ask fellow climbers who have done the route and read route descriptions for details, like "save a No. 1 and No. 2 for the anchor," and keep these in mind as you're climbing. If there isn't any concrete info and you have no idea what's up there, a good rule of thumb is to try and save a small, a medium, and a large cam for the anchor.
