Ewing Tumor - Stages | American Cancer Society
Appendiceal neoplasms are uncommon tumors of the gastrointestinal tract that may manifest with symptoms of appendicitis, right lower quadrant pain, or palpable mass, leading to imaging or surgical intervention. The majority of appendiceal masses consist of primary epithelial neoplasms and neuroendocrine tumors (NETs). Epithelial neoplasms—mucinous and nonmucinous types—are more often ...

Pathology of eyelid tumors

A skin tag (acrochordon) is a fleshy polyp composed of skin, fibrous tissue, and blood vessels. It is characteristically found on the neck, armpit, and inguinal (groin) creases of most adult humans at one time or another. When the blood supply at the base of the polyp becomes compromised, there may be pain associated with the tag as it dies.

In general, chemo is used for faster-growing brain tumors. Some types of brain tumors, such as medulloblastoma and lymphoma, tend to respond better to chemo than others. Chemo is not as helpful for treating some other types of tumors, such as spinal cord tumors, so it is used less often for these tumors.
