Abstract: Urinalysis; Approved Guideline - Third Edition (CLSI document GP16-A3) is written for laboratory and nonlaboratory personnel responsible for the collection, transport, and analysis of urine specimens. The guideline addresses macroscopic evaluation, chemical analysis, and microscopic examination of urine. A step-by-step outline for collecting, transporting, and storing specimens is included.

GP16: Urinalysis, 3rd Edition

Clinical and Laboratory Standards Institute (CLSI), formerly NCCLS, is committed to promoting quality health care through consensus standards, guidelines, and best practices. CLSI is dedicated to providing the highest quality standards for health care testing and related health care services, and values this opportunity to support the much-needed effort for consumer education in the area of medical laboratory testing.

European Urinalysis Guidelines - ??? ???

The 2014 CLSI guidelines retained the current MICs for cefazolin against enterobacteriaceae, but specified that susceptible results were based on a dosing regimen of 2 grams intravenously every 8 hours. One of the major changes included in these guidelines involves the reporting of a urine-specific cefazolin MIC for enterobacteriaceae (susceptible ≤ 16 mcg/mL).
