Calibration Verification/Linearity and Method Validation. AUDIT offers the most complete line of Calibration Verification and Linearity products designed to assist with CLIA-88 revalidation.

National public health :: Home

For PCR, our national lab partners use the Roche Cobas or PANTHER Hologic platform, which also has FDA Emergency Use Authorization. For Rapid Testing, we use BD Veritor and Quidell Sophia 2. Both platforms have FDA Emergency Use authorization. For Spike Protein Antibody Testing, we use the Roche e411 lab platform.

CityMD | CityMD

CSF and serum S100 concentration was tested on the COBAS e411 analyzer (Roche Diagnostics, Penzberg, Germany) according to the manufacturer ' s instructions. The assay is dedicated to the quantitative determination of S100 (S100 A1B and S100 BB) in human samples. Detection range is between 0.005 and 39 µg/l.

()

Specimens from 167 PCR-positive patients and 103 control specimens were analyzed using the Elecsys anti-SARS-CoV-2 S assay on the cobas e411 (Roche Diagnostics). Analytical evaluation included assessing linearity, imprecision, and analytical sensitivity.

IL-6 Quotient biomarker of unruptured intracranial ...

Serum C-reactive protein (CRP) and albumin levels were determined by immunoturbidimetry (Cobas 6000-c501, Roche Diagnostics Mannheim, Germany). The complete blood count was measured using a Hematology Analyzer (Beckman Coulter). Ferritin was estimated by luminescent electrochemistry (Cobas e411, Roche Diagnostics Mannheim, Germany).

2.13 The Elecsys and Elecsys STAT tests are designed to be used in a laboratory on the Roche cobas e411, e601, and e602 analysers. The company says that performance is the same when used on these analysers. The test can also be run on the cobas e801 analyser, which is designed for very high throughput as both a standard and STAT test.
