Cod and Herring: The Archaeology and History of Medieval ...

Cod and Herring explores both incremental and punctuated changes in marine fishing, providing a unique perspective on the rhythm of Europe's environmental, demographic, political and social history. The 21 chapters - by experts in their respective fields - cover a range of regions and methodological approaches, but come together to tell a coherent story of long-term change.

Cod & Herring: The Archaeology & History of Medieval Sea ...

Catches probably peaked c.1300, and preserved herring and cod contributed to long-range trade in high-bulk, low-value goods. This development was part of the great economic expansion of Europe at this time, with its increasing demand for food, growing facilities for regular international trade and greater availability of capital.

Cod and Herring : The Archaeology and History of Medieval ...

We propose the concept of the "Fish Revolution" to demarcate the dramatic increase in North Atlantic fisheries after AD 1500, which led to a 15-fold increase of cod (*Gadus morhua*) catch volumes and likely a tripling of fish protein to the European market. We consider three key questions: (1) What were the environmental parameters of the Fish Revolution?
