Newton's second law states that the net force, or the vector sum of all the forces acting on an object, equals the mass times the acceleration. So, it is possible to have forces act on an object without acceleration if the forces are oriented such that they vector sum to zero. An example would be a person sitting in a chair.

CogAT Test (Cognitive Abilities Test) -
TestingMom.com

CogAT scoring is based on your child's age (not grade level). Your child will receive what's called an SAS, or "Standard Age Score," which compares your child's score against other children in the same age range. The highest SAS that a child can receive on the CogAT is 160, while 100 is considered to
