Color Management Overview | dpBestflow

Digital photography was supposed to be simple. We take a photo, upload it to our computer, share it with friends and print it on our inkjet printer. The results, though can be disappointing, colors not right, too little or too much contrast. One of the main culprits for this, is what is known as color management.

Color Management for Photographers @Digital Outback Photo

Even though modern digital imaging software is usually able to automate the process of color management, certain aspects will always remain subjective. Having a deeper understanding of this process – and what choices to make – helps photographers make the most of their digital images.
