Amazon.com: Customer reviews: Color Management in Digital ...

Digital photography was supposed to be simple. We take a photo, upload it to our computer, share it with friends and print it on our inkjet printer. The results, though can be disappointing, colors not right, too little or too much contrast. One of the main culprits for this, is what is known as color management.

Overview of Color Management - Cambridge in Colour

Color management basics. A conventional digital color photo uses a mix of red, green and blue to create the colors in an image. But the RGB values for a pixel don't define an exact color unless they are accompanied by a color profile. This color profile lets the computer know how to decode the color properly.
